Brassavola species

Z -1516 *Brassavola glauca (=Rhyncholaelia glauca)* SELF

Pot Size (Inches): 2 1/2" Nice species from central America (Mexico, Guatemala and Honduras) with waxy and cream colored flowers. Plants like intermediate to warm climate, with very good light. Plants should be preferably mounted.
Price (USD): 22,00

Z -1700 *Brassavola martiana* x SELF

Pot Size (Inches): 2 1/2" (NBS) Nice Brassavola with smaller flowers. These species occurs in the Amazonian region, so they like warm and humid weather. Easy to grow.
Price (USD): 20,00

C. aclandiae

Z -1395 *C. aclandiae 'Itaparica'* x *C. aclandiae 'Mulatinha'*

Pot Size (Inches): NBS We used two superior quality C. aclandiae with also darker flowers.
Price (USD): 37,00

Z -1233 *C. aclandiae 'Nigrella'* x *C. aclandiae 'AM'*

Pot Size (Inches): 2 1/2" (NBS) Crossing of two "type" plants, but with darker colors and excellent flower shapes.
Price (USD): 37,00

C. amethystoglossa

Z -935 *C. amethystoglossa 'Córrego do Cachorro'* x *C. amethystoglossa 'Palmira'*

Pot Size (Inches): 3" Two selected plants of C. amethystoglossa.
Price (USD): 24,00

Z -1158 *C. amethystoglossa creme pintada 'Gaturama'* x *C. amethystoglossa palha 'Gloriosa'*

Pot Size (Inches): 3" (NBS) Both plants have very light pink tones on petals/sepals, with few spots. C. amethystoglossa palha 'Gloriosa' has also a very good flower shape. Similar to Z-1050.
Price (USD): 23,00

Z -1175 *C. amethystoglossa creme 'WFS'* x SELF

Pot Size (Inches): 3" Self pollination of this light cream colored flower, with also few spots and very good shape.
Price (USD): 34,00

Z -1060 *C. amethystoglossa 'FPA'* x *C. amethystoglossa 'ESI'*

Pot Size (Inches): 3" (NBS) Crossing of two plants with superior quality flowers.
Price (USD): 20,00

Z -1032 *C. amethystoglossa 'FPA-E'* x *C. amethystoglossa rubra*

Pot Size (Inches): 3" C. amethystoglossa 'FPA-E' is one of the best in our collection, with very wide petals and sepals. C. amethystoglossa rubra has darker color and also good shape. We expect darker colors and good flower shapes.

Z -734 *C. amethystoglossa 'Itapebí'* x *C. amethystoglossa XXX (JEI)*

Pot Size (Inches): 3" Crossing of two very well shaped flowers. Size of flowers is smaller, but both plants produces many flowers in a dense bouquet.
Price (USD): 35,00

Z -1176 *C. amethystoglossa 'Lorena'* x *C. amethystoglossa 'Jubarte'*

Pot Size (Inches): 2 1/2" Both plants have superior quality flowers. Similar to Z-1174.
Price (USD): 28,00

C. amethystoglossa

Z -1050 ***C. amethystoglossa palha 'Gloriosa'*** x ***C. amethystoglossa 'Palhina'***

Pot Size (Inches): 3" (NBS)
Price (USD): 24,00

Few plants available. This is a cross between two special plants. The *C. amethystoglossa palha 'Gloriosa'* has very well shaped flowers. Petals/sepals are of light cream color with only a few spots. *C. amethystoglossa 'Palhina'* is similar. We expect good shapes and light colors, following the characteristics of the parents.

Z -1157 ***C. amethystoglossa rubra 'Cardeal'*** x ***C. amethystoglossa 'Palmira'***

Pot Size (Inches): 3" (NBS)
Price (USD): 24,00

Cattleya amethystoglossa 'Palmira' has standard color for this species, but exceptional wide petals/sepals and flower shape. *C. amethystoglossa rubra 'Cardeal'* has dark colored flowers and also good shape. Our objective is to combine dark colors and very good flower shapes.

Z -1174 ***C. amethystoglossa tipo 'Walney'*** x ***C. amethystoglossa tipo 'Dario Martins'***

Pot Size (Inches): 3" - 3 1/2"
Price (USD): 28,00

Crossing of two superb standard colored flowers.

C. araguaiensis

Z -1667 ***C. araguaiensis*** x **SELF**

Pot Size (Inches): NBS-BS
Price (USD): 35,00

Different from typical *Cattleya* (bifoliate and monofoliate). Petals and sepals are skinny and brown colored. The lip has tubular shape and is white with purple tip. This species is already being moved to a new exclusive genera. Cultivation is easy (although we killed our older plants, we learned). Keep humid, in a little shadier condition. They need warm conditions. Our plants are mounted and potted on regular media.

C. bicolor

Z -877 ***C. bicolor chocolate XXX*** x **SELF**

Pot Size (Inches): 2 1/2"
Price (USD): 24,00

No plants have flowered yet. Hope to achieve this chocolate color as the parent plant.

C. dowiana

Natural species - Costa Rica

Z -1054 ***C. dowiana*** x **SELF**

Pot Size (Inches): 3" (NBS)
Price (USD): 30,00

C. dowiana, from Costa Rica, looks like *C. aurea* from Colombia (crossing Z-872). In the past *C. aurea* was considered a variety of *C. dowiana*, but flowers from *C. dowiana* are generally smaller and have a coppery color on petals and sepals. Plants like high humidity but extremely aerated conditions.

Z -1505 ***C. dowiana 'Rosea'*** x **SELF**

Pot Size (Inches): 2 1/2"
Price (USD): 25,00

Same as Z-1054. In this case plants are also healthy but a little smaller.

C. eldorado

Natural species - Brazil (Amazon)

Z -1234 ***C. eldorado alba 'Virginalis'*** x ***C. eldorado 'Gigante Azul'***

Pot Size (Inches): 2 1/2" - 3"
Price (USD): 30,00

Both are very nice plants. *C. eldorado 'Gigante Azul'* has a lighter pink color tending to amesiana variety.

Z -1009 ***C. eldorado concolor punctata 'Bela'*** x **SELF**

Pot Size (Inches): 2 1/2" - 3"
Price (USD): 30,00

This plant has good flower shape, with light pink (concolor) color, but with a small red spot in the lip.

Z -1165 ***C. eldorado magenta orlata pincelada 'Tapajó'*** **SELF**

Pot Size (Inches): 2 1/2"
Price (USD): 45,00

Excellent flower shape, big flowers with dark purple petals and sepals (also splashed) and very dark magenta lip.

C. eldorado Natural species - Brazil (Amazon)

Z -1321 *C. eldorado semi alba 'Iracema'* x **SELF**

Pot Size (Inches): 2 1/2" - 3" Self pollination of a nice semi alba.

Price (USD): 35,00

Z -787 *C. eldorado tipo XXX* x *C. eldorado rubra*

Pot Size (Inches): 3" We expect good shaped flowers, with darker than average colors.

Price (USD): 28,00

C. elongata Natural species - Brazil (Bahia State)

Z -995 *C. elongata* x *C. elongata*

Pot Size (Inches): 2" - 2 1/2" This species grows only at altitudes around 600 meters at Chapada Diamantina formation in the State of Bahia. Mountains are table top like and plants grow on arenitic formation in full sun. Intermediate to warm temperature is required, with very aerated potting media.

Price (USD): 20,00

Z -1102 *C. elongata albina 'Caldasso' (x SELF)* x **SELF**

Pot Size (Inches): 2 1/2" Few plants. This is a rare plant) and in this case petals/sepals are green and the lip is white.

Price (USD): 53,00

Z -1108 *C. elongata semi alba 'Campo Redondo'* x **SELF**

Pot Size (Inches): 2 1/2" Few plants of this rare variety. Petals/sepals are green and the lip is purple. Plant has also average shape (good) for this species.

Price (USD): 53,00

C. gaskelliana

Z -1496 *C. gaskelliana caerulea (12-1)* x *C. gaskelliana caerulea (11-1)*

Pot Size (Inches): 2 1/2" We expect all caeruleas based on the result of a similar previous crossing.

Price (USD): 30,00

Z -1094 *C. gaskelliana caerulea ('Aida' x 'Alexis')* x **SELF**

Pot Size (Inches): 2 1/2" - 3" There is a very high possibility of obtaining caeruleas with this self pollination. This plant has also very good flower shape.

Price (USD): 38,00

Z -1497 *C. gaskelliana caerulea 'Vista Linda' (Z-360)* x *C. gaskelliana caerulea 'Boas Vista' (Z-360)*

Pot Size (Inches): 2 1/2" Similar to Z-1496.

Price (USD): 30,00

Z -974 *C. gaskelliana 'Da. Norma Deher'* x **SELF**

Pot Size (Inches): 2 1/2" - 3" C. gaskelliana (type color) 'Da. Norma Dreher' has superior flower shape. We expect very nice plants.

Price (USD): 20,00

C. granulosa Natural species - Brazil (Northeast coast)

Z -1193 *C. granulosa 'Coliseu'* x *C. granulosa 'Formosa'*

Pot Size (Inches): 2 1/2" - 3" Crossing of two selected cones. C. granulosa is very similar to C. schofieldiana and some people say they are different populations of the same species. Flowers are almost identical. Usually we set them apart by by flowering season and by plant morphology. C. schofieldiana (occur naturally in Espirito Santo State and Bahia State) has skinny pseudobulbs and leafes. C. granulosa (occurs naturally in the northeastern Brazilian coast) usually are heavier plants, looking like a C. guttata or C. amethystoglossa.

Price (USD): 28,00

C. granulosa

Natural species - Brazil (Northeast coast)

Z -952 C. granulosa 'Expo X' x SELF

Pot Size (Inches): 2 1/2" - 3" Self pollination of a selected plant.

Price (USD): 28,00

C. guttata

Natural species - Brazil (Southeast)

Z -1110 C. guttata amarela sem pintas 'Onça Parda' x SELF

Pot Size (Inches): 2 1/2" - 3" Rare. Petals and sepals are of yellow/brown color. The cultivar 'Onça Parda' means "Cougar" or "Mountain Lion" due to the color of the petals and sepals. By the way, this big cat also occurs in Brazil. Please see photo on the front cover of American Orchid Society Orchids Magazine - April-2008 issue.

Price (USD): 200,00

Z -1308 C. guttata bronze sem pintas 'Carlitus' x SELF

Pot Size (Inches): 2 1/2" - 3" Rare color. This spotless bronze colored C. guttata used in this self pollination is really outstanding. Very high possibility of obtaining bronze colored flowers.

Price (USD): 140,00

Z -1106 C. guttata caerulea sem pintas 'Monte Verde' SELF

Pot Size (Inches): 2 1/2" - 3" Rare. The "typical" caerulea for this species has green petals/sepals with brown spots and blue lip. The C. guttata caerulea 'Monte Verde' is unusual because it has almost no spots, making it a very rare and attractive variety.

Price (USD): 200,00

Z -698 C. guttata coerulea 'AWZ' x SELF

Pot Size (Inches): NBS-BS Few plants available. Confirm caerulea.

Price (USD): 150,00

Z -1111 C. guttata creme sem pintas 'Edelweiss' x SELF

Pot Size (Inches): 2 1/2" - 3" Rare. This spotless flower is light colored (cream color) with an almost white lip. The lip has a delicate pink color making it a very unusual and beautiful variety for this species.

Price (USD): 200,00

Z -1109 C. guttata verde sem pintas 'AWZ' x SELF

Pot Size (Inches): 2 1/2" Rare. This could be considered a 'semi alba' variety for this species. Petals and sepals are pure green and without spots. The lip is purple. Few plants available.

Price (USD): 200,00

Z -700 C. guttata verde sem pintas 'AWZ' x C. guttata amarela sem pintas 'Onça Parda'

Pot Size (Inches): NBS - BS Few plants available. This is a cross between two extremely rare spotless varieties. The "C. guttata verde sem pintas 'AWZ'" has green petals and sepals with purple lip. The second plant "C. guttata amarela sem pintas 'Onça Parda'" has dark yellow/brownish petals and sepals with purple lip. Both plants don't have spots on petals and sepals (sometimes they are called semi albas). All plants that flowered confirm spotless flowers. They are healthy plants and soon we will have difficulties to pack them due to size.

Price (USD): 220,00

C. harrisoniana

Z -1493 C. harrisoniana tipo 'Rainha do Brejo' x C. harrisoniana tipo 'Cheung's Delight'

Pot Size (Inches): 3" (NBS) Some plants bloomed and there was a high percentage of flowers with exceptional shape and rounded petals.

Price (USD): 25,00

AZ -2 C. harrisoniana var. trilabelo x

Pot Size (Inches): BS We are offering confirmed peloric plants in this item (also called Trilabelo). C. harrisoniana normally has narrow petals and sepals. In this rare plant, petals are wide and reproduce the shape of the lip. Flowers are flat and don't reproduce the characteristic of petals bending forward that generally happens in peloric forms on most orchids.

Price (USD): 136,00

Z -1278 C. harrisoniana 'Z-533' x C. harrisoniana 'Rainha do Brejo'

Pot Size (Inches): 2 1/2" (NBS) Crossing of two selected "types" with wide petals.

Price (USD): 20,00

C. intermedia

Z -1217	<i>C. intermedia alba 'AWZ'</i>	x	<i>C. intermedia aquini alba 'AWZ'</i>
Pot Size (Inches): 2 1/2"	We expect alba variety or alba-peloric.		
Price (USD): 20,00			
Z -938	<i>C. intermedia aquini alba 'Neve'</i>	x	<i>C. intermedia aquini alba 'Sublime'</i>
Pot Size (Inches): NBS	Crossing of two selected alba varieties with also peloric form. We expect to obtain plants similar to the parents, which are rare. <i>C. intermedia</i> var. alba peloric is a man made variety and was never found in nature.		
Price (USD): 28,00			
Z -1408	<i>C. intermedia aquini vinicolor 'Formosa'</i>	x	<i>C. intermedia aquini vinicolor 'Condor'</i>
Pot Size (Inches): 2 1/2"	We used two selected plants from previous crossings.		
Price (USD): 20,00			
Z -1063	<i>C. intermedia aquini-flamea 'AWZ'</i>	x	<i>C. intermedia</i>
Pot Size (Inches): 3"	We expect to obtain flowers of flamea variety, but also "types" with intense colors.		
Price (USD): 20,00			
Z -1406	<i>C. intermedia caer. aquini flamea 'AWZ'</i>	x	<i>C. intermedia aquini caerulea 'AP'</i>
Pot Size (Inches): 2 1/2"	We expect to repeat this variety.		
Price (USD): 18,00			
Z -1216	<i>C. intermedia orlata marginata caerulea 'AWZ'</i>		<i>C. intermedia caerulea aquini flamea 'AWZ'</i>
Pot Size (Inches): 2 1/2"	When crossing two plants we always imagine getting a combination of the best from both worlds. Of course this is extremely rare....almost impossible. In this cross we probably imagined that....let's speculate a little.		
Price (USD): 18,00			
Z -656	<i>C. intermedia orlatão 'Pedra Azul'</i>	x	<i>C. intermedia flamea</i>
Pot Size (Inches): NBS	The name "orlatão" is an informal term used by Brazilian growers that refers to a "big orlate lip". The lip in this case is much larger than usual and it's darker edge spreads all the way around it. The flamea variety has dark markings on petals (heavy splashed but not peloric).		
Price (USD): 20,00			
Z -1219	<i>C. intermedia sanguinea 'do Padre Vitus'</i>	x	<i>C. intermedia flamea 'BF-96'</i>
Pot Size (Inches): 2 1/2"	<i>C. intermedia sanguinea</i> 'do Padre Vitus' is an old plant and very dark variety but narrower petals and sepals. Maybe we can achieve better flower shapes with this cross and also dark colors.		
Price (USD): 18,00			
Z -931	<i>C. intermedia semi alba-orlatão 'Fusae'</i>	x	<i>C. intermedia pelorica 'Rabo de Pavão'</i>
Pot Size (Inches): 2 1/2" - 3"	Crossing within the same species, but using two completely different varieties (semi alba with large lip x peloric).		
Price (USD): 20,00			

C. jenmanii

Natural species - Venezuela

Z -1455	<i>C. jenmanii 'Boliva'</i>	x	<i>C. jenmanii rubra 'Serra Negra'</i>
Pot Size (Inches): 3"	Cross of two selected <i>C. jenmani</i> , with wide petals.		
Price (USD): 28,00			
Z -1301	<i>C. jenmanii orlata 'Pacaraima'</i>	x	SELF
Pot Size (Inches): 2 1/2" - 3"	This orlata variety has type lilac colors, but the darker color of the lip spreads all the way around its circumference.		
Price (USD): 28,00			
Z -1049	<i>C. jenmaniii caerulea 'Pedra Azul'</i>	x	SELF
Pot Size (Inches): BS	Plants confirm blue varieties with nice colors. <i>C. jenmaniii</i> occurs naturally in Venezuela, near the brazilian border of Roraima State. Plants and flowers look very much with the brazilian <i>C. labiata</i> . This blue variety is very rare.		
Price (USD): 35,00

C. kerrii

Z -1255 C. kerrii 'Brasileirinha' x SELF

Pot Size (Inches): 2 1/2" (NBS) It's very hard to obtain good shaped C. kerrii. We will keep trying by only using higher than the average quality plants.
Price (USD): 19,00

Z -1384 C. kerrii 'Itapebi' x C. kerrii 'Bahia'

Pot Size (Inches): 2 1/2" (NBS) C. kerrii is now endangered in nature. Plants are monofoliolate although flowers and plant morphology reminds of a bifoliolate Cattleya. Plants usually don't have good flower shape and lips are always bent backwards. Hope we can achieve something better due to the parents used.
Price (USD): 19,00

C. labiata

Natural species - Brazil (Northeast)

Z -904 C. labiata alba x C. labiata roxo bispo 'Urbano'

Pot Size (Inches): NBS - BS C. labiata roxo bispo 'Urbano' is a top quality plant with exceptional flower shape and also one different pink tone on the lip. Petals and sepals are light colored. We expect lighter color tones and very good flower shapes. Please see also Z-903 and Z-1018.
Price (USD): 35,00

Z -1004 C. labiata alba 'Jassira' (Z-86) x C. labiata alba 'Pernambuco' (BH-200)

Pot Size (Inches): 2 1/2" - 3" Crossing of two selected albas of this species.
Price (USD): 35,00

Z -903 C. labiata alba 'Ótima' XXX x C. labiata roxo bispo 'Urbano'

Pot Size (Inches): 3" - 3 1/2" C. labiata roxo bispo 'Urbano' is rare in collections and is an exceptional plant in terms of color (very light pink in petals/sepals and a different tone of purple in the lip known as "roxo bispo" among Brazilian growers) and exceptional flower shape. Previous crossings reveal it also to be a good parent plant. See also Z-904 and Z-1018.
Price (USD): 35,00

Z -893 C. labiata amesiana 'Bela' (Z-8) x SELF

Pot Size (Inches): 2 1/2" - 3" Beautiful amesiana variety, selected from previous cross. We expect this variety to confirm, with also very good flower quality.
Price (USD): 38,00

Z -1352 C. labiata amesiana concolor 'Serra Negra' x C. labiata amesiana 'Angel' (Z-43)

Pot Size (Inches): 2 1/2" Similar to Z-1348. C. labiata amesiana 'Serra Negra' is a very beautiful plant, also vigorous grower.
Price (USD): 30,00

Z -1353 C. labiata amesiana concolor 'Serra Negra' x C. labiata amoena 'Preciosa' (Z-8)

Pot Size (Inches): 2 1/2" - 3" Similar to Z-1348 and Z-1352.
Price (USD): 30,00

Z -1006 C. labiata amesiana lineata 'AWZ' (Z-8) x C. labiata amesiana lineata 'P. Azul' (Z-8)

Pot Size (Inches): 2 1/2" - 3" Sibling cross of two selected amesiana varieties. Both plants have a very thin vertical dark line on the lip.
Price (USD): 30,00

Z -1348 C. labiata amesiana 'São Gabriel' (Z-8) x C. labiata amesiana 'Rei Momo' (Z-43)

Pot Size (Inches): 2 1/2" Both plants used were selected from previous crosses. We expect high quality amesianas.
Price (USD): 30,00

Z -1018 C. labiata amesiana 'Super Star' (Z-43) x C. labiata roxo bispo 'Urbano'

Pot Size (Inches): 2 1/2" - 3" Please see Z-903 and Z-904. In this case we are trying to obtain amesiana tones of pink with also excellent shapes.
Price (USD): 35,00

Z -1351 C. labiata amoena 'Preciosa' (Z-8) x C. labiata alba 'Cisne Branco' (Z-268)

Pot Size (Inches): 2 1/2" C. labiata amoena 'Preciosa' is a semi alba with light colored lip (amoena). We expect flowers in light tones of pink.
Price (USD): 20,00

C. labiata Natural species - Brazil (Northeast)

Z -710	C. labiata caerulea 'Bastião'	x	C. labiata caerulea 'Lourival'
Pot Size (Inches): NBS - BS	Plants are confirming nice caeruleas with lip similar to C. labiata caerulea 'Lourival'.		
Price (USD): 38,00			
Z -1355	C. labiata caerulea 'Filha de Junior'	x	C. labiata caerulea 'Filha de Panelas'
Pot Size (Inches): 2 1/2"	Second generation cross between to very good C. labiata caerulea. Also a sibling. We expect nice things.		
Price (USD): 38,00			
Z -1022	C. labiata caerulea 'Pedra Azul' (Z-185)	x	C. labiata caerulea 'Luizinho' (Z-105)
Pot Size (Inches): 2 1/2" - 3"	Both caeruleas originated from different crossings. We expect to improve quality of caeruleas in this species.		
Price (USD): 38,00			
Z -1017	C. labiata caerulea 'Titi' (Z-185)	x	C. labiata caerulea 'Blue Sky' (Z-185)
Pot Size (Inches): 2 1/2" - 3"	Sibling cross with two exceptional plants. Similar to Z-876.		
Price (USD): 38,00			
Z -902	C. labiata caerulescens 'Da. Norma Dreher'	x	SELF
Pot Size (Inches): 2 1/2"	This is an old plant in our collection and very famous among Brazilian growers, although not common in collections. Plant is also known as C. labiata 'Canoinha'. It's a beautiful bluish variety, also called var. amethystina with excellent shape.		
Price (USD): 38,00			
Z -1349	C. labiata punctata	x	C. labiata punctata (quase concolor) 'AWZ'
Pot Size (Inches): 2 1/2"	Both plants used have only one purple "dot" on the lip making them an interesting (and also nice shaped) variety.		
Price (USD): 25,00			
Z -1005	C. labiata rubra orlata 'Maravilha' (Z-86)	x	C. labiata rubra orlata 'Veludo Escuro' (Z86)
Pot Size (Inches): 2 1/2" - 3"	In this case, we did a sibling cross choosing both plants with very dark flowers and good shape. Also the orlata variety means that darker color of the lip goes all the way on its circumference.		
Price (USD): 30,00			
Z -713	C. labiata rubra 'Schuller'	x	C. labiata rubra 'Deize'
Pot Size (Inches): 3"	Crossing of two plants with very dark colors and excellent shapes. Both are "#1" plants. We expect dark flowers or average purple color and very nice shapes.		
Price (USD): 26,00			
Z -1354	C. labiata rubra-integra-oralata 'Z-41'	x	C. labiata rubra-int.-orl. pincelada 'ZAS-1'
Pot Size (Inches): 2 1/2"	Both have very dark flowers and excellent shapes. Lips have no light colored borders (integra) and darker tone spreads all the way around (oralata). C. labiata rubra-int.-orl. pincelada 'ZAS-1' has also a splash marking on the edge of the petals.		
Price (USD): 24,00			
Z -917	C. labiata semi alba 'Marina'	x	C. labiata semi alba sanguinea 'A. Paccione'
Pot Size (Inches): 2 1/2" - 3"	Similar to Z-620 and Z-621.		
Price (USD): 35,00			
Z -1133	C. labiata semi alba 'Aiko'	x	C. labiata semi alba 'Magnifica' (Z-12)
Pot Size (Inches): 2 1/2" - 3"	Similar to Z-620 and Z-621.		
Price (USD): 26,00			
Z -1347	C. labiata semi alba 'Arlequim' (Z-12)	x	C. labiata semi alba 'Branca de Neve' (Z-268)
Pot Size (Inches): 2 1/2"	Second generation of C. labiata semi alba. We used selected plants from different crossings.		
Price (USD): 24,00			
Z -620	C. labiata semi alba 'Garganta Escura'	x	C. labiata s/alba ('Cooksoniae' x 'Gloriosa')
Pot Size (Inches): 3 1/2" (NBS)	Similar to Z-621. This is a crossing of two selected semi albas with great flower shapes. Plants are confirming good semi albas.		
Price (USD): 38,00

C. labiata

Natural species - Brazil (Northeast)

Z -621 C. labiata semi alba 'Garganta Escura' x C. labiata semi alba sanguinea 'Paccione'

Pot Size (Inches): 3" (NBS) Similar to Z-620. The semi alba 'Garganta Escura' (Dark lip throat) has large sized flowers and impeccable shape. The flower looks like an alba, but the inner part of the lip has darker color. C. labiata semi alba 'Paccione' has an intense purple color covering a large area of the lip. Plants are confirming semi albas.
Price (USD): 38,00

Z -1360 C. labiata semi alba 'Marina' x C. labiata semi alba perola 'Vila Velha'

Pot Size (Inches): 2 1/2" Two beautiful semi alba varieties. C. labiata semi alba 'Marina' is an old and well known plant. C. labiata semi alba perola 'Vila Velha' originated from our previous cross. This plant has great shape and intense lip. Petals and sepals has a very pale tone of pink ("perola").
Price (USD): 26,00

Z -715 C. labiata semi alba 'Marina' x C. labiata alba 'Nuvem Branca'

Pot Size (Inches): 4" (NBS) Crossing of our C. labiata alba 'Nuvem Branca' (= 'White Cloud' if translated from Portuguese), which is a selected clone, with C. labiata semi alba 'Marina'. This last plant is one of the most famous semi albas in this species, well known for its excellent shape. It was found decades ago in the woods and we have this original division used in this crossing. We expect albas or semi albas.
Price (USD): 26,00

Z -894 C. labiata semi alba 'Perfection' (Z-12) x SELF

Pot Size (Inches): 2 1/2" - 3" Similar to Z-620 and Z-621, but in this case a Self pollination.
Price (USD): 26,00

Z -1003 C. labiata semi alba 'Pingo de Luz' (Z-12) x C. labiata alba 'Jassira' (Z-86)

Pot Size (Inches): 3" - 3 1/2" This is a second generation cross using two selected plants. We expect high quality semi alba or alba.
Price (USD): 25,00

Z -892 C. labiata semi alba 'Robusta' x SELF

Pot Size (Inches): 3" This plant used has very vigorous growth. Flowers are also nice.
Price (USD): 24,00

Z -1132 C. labiata tipão 'Rodrigues' x C. labiata tipo 'Cara Grande'

Pot Size (Inches): 3" (NBS) Two selected "types" but with very good shapes.
Price (USD): 24,00

Z -707 C. labiata 'Vera Cristina' x C. labiata lilas 'Borges'

Pot Size (Inches): 3" Both are superb clones, with excellent shapes and darker colors.
Price (USD): 28,00

Z -716 C. labiata 'Yellow Eyes' x C. labiata tipo escura (Z-68)

Pot Size (Inches): 2 1/2" - 3" C. labiata 'Yellow Eyes' is a well known plant and as the name describes it, flowers have two yellow marks on the lip. We crossed this plant with a dark selected clone hoping to obtain "yellow eyes" contrasting to darker colors.
Price (USD): 30,00

C. leopoldii

Natural species - Brazil (Bahia State)

Z -1207 C. leopoldii caerulea 'Baiana' x SELF

Pot Size (Inches): NBS - BS Very rare. Seedlings confirm caerulea variety. C. leopoldii are native to southern Brazil, but this plant originates from an isolated population in state of Bahia, which is more than one thousand miles (1600 Km) north of the usual habitat. Plant is not a C. guttata and also have same flowering season and characteristics of the C. leopoldii.
Price (USD): 160,00

Z -1083 C. leopoldii escura 'Brilhosa' x C. leopoldii vinho 'Fininha'

Pot Size (Inches): 3" (NBS) C. leopoldii escura 'Brilhosa' has brilliant waxy dark colored flowers. C. leopoldii vinho 'Fininha' has wine colored petals/sepals.
Price (USD): 20,00

Z -1430 C. leopoldii trilabelo 'Monte Verde' x SELF

Pot Size (Inches): 2 1/2" We expect a good percentage of trilabelos from this self pollination. The mother plant is beautiful and has a vigorous growth.
Price (USD): 45,00

C. loddigesii

Natural species - Brazil (Southeast)

Z -1062 C. loddigesii alba 'Rina Graciano Brizola' x C. loddigesii alba 'HI'

Pot Size (Inches): 2 1/2" We expect to reproduce the beautiful alba variety of this species.
Price (USD): 20,00

Z -748 C. loddigesii punctata 'AWZ' x C. loddigesii 'AWZ' No 6

Pot Size (Inches): 2 1/2" (NBS) Crossing of a spotted (punctata) C. loddigesii with the selected 'AWZ #6', a "type" one, but with superb flower quality.
Price (USD): 20,00

C. lueddemanniana

Natural species - Venezuela

Z -1227 C. lueddemanniana (caer. 'Mariauxi' x tipo)x C. lueddemanniana caerulea 'Tania'

Pot Size (Inches): 2 1/2" - 3" Interesting cross of a "type" colored flower (but with a caerulea being one of it's parents) with another caerulea. It's possible that a small percentage of seedlings confirm caerulea with also good shapes and vigorous growth.
Price (USD): 20,00

Z -747 C. lueddemanniana (Morena x OK-2) 'No. 1'x C. lueddemanniana dark lip - splash

Pot Size (Inches): NBS - BS Few plants available. Two plants with dark colored flowers and excelent shapes. We intend to obtain superior quality flowers. One of the parent plants has a splash in the petals and we hope it will be transmitted.
Price (USD): 20,00

Z -1085 C. lueddemanniana alba 'OMG' x C. lueddemanniana caerulea 'Siquesique'

Pot Size (Inches): BS This is a remake of one succesfull crossing we did before. The plants have a lighter purple tone ("rosadas") - different from the typical "type" flower purple, and usually have very good shape.
Price (USD): 30,00

Z -861 C. lueddemanniana caerulea (Ssique x Murill C. lueddemanniana caerulea (Mariauxi x Ampa

Pot Size (Inches): NBS - BS Many plants that flowered confirmed caerulea variety. Flower shapes are very good.
Price (USD): 40,00

Z -820 C. lueddemanniana caerulea 'Lena' x C. lueddemanniana caerulea 'Celeste'

Pot Size (Inches): 2 1/2" - 3" Similar to Z-956.
Price (USD): 40,00

Z -1382 C. lueddemanniana caerulea 'Monte Verde'x C. lueddemanniana caerulea 'Mar azul'

Pot Size (Inches): 3" (NBS) Will possibly confirm caerulea due to this tird generation cross of selected plants.
Price (USD): 40,00

Z -962 C. lueddemanniana caerulea 'Pedra Azul' XXX C. lueddemanniana caerulea 'Caribe'

Pot Size (Inches): NBS - BS Similar to Z-956.
Price (USD): 40,00

Z -1630 C. lueddemanniana caerulea splash 'Bela' x SELF

Pot Size (Inches): 2 1/2" Rare variety of C. lueddemanniana. Petals have a blue marking on their edge (splash). We expect to obtain this variety.
Price (USD): 50,00

Z -653 C. lueddemanniana concolor clara x SELF

Pot Size (Inches): NBS - BS The large flowers of this clone are light pink, well shaped and concolor variety (no darker color on the lip).
Price (USD): 28,00

Z -791 C. lueddemanniana escura x C. lueddemanniana 'America'

Pot Size (Inches): NBS - BS C. lueddemanniana (type) 'America' has a superb flower shape and large size.
Price (USD): 20,00

C. lueddemanniana Natural species - Venezuela

Z -796 **C. lueddemanniana escura** x **C. lueddemanniana 'Labelo Dourado'**
Pot Size (Inches): NBS - BS Crossing of two excellent plants. We expect the plants to reproduce the standards of the parent plants, with strong colors in petals and sepals, and also stronger yellow mark on the lip.
Price (USD): 20,00

Z -1188 **C. lueddemanniana escura 'Roja'** x **C. lueddemanniana escura 'Orinoco'**
Pot Size (Inches): NBS - BS Similar to Z-940.
Price (USD): 20,00

Z -1189 **C. lueddemanniana escura 'Roja'** x **C. lueddemanniana escura 'Red'**
Pot Size (Inches): 2" (NBS) Similar to Z-940.
Price (USD): 20,00

Z -780 **C. lueddemanniana 'Negrita'** x **C. lueddemanniana 'Dark'**
Pot Size (Inches): NBS - BS Few plants available. Both parents have large flowers, excellent flower shape and dark colors. These are among the darkest plants in our collection.
Price (USD): 20,00

Z -693 **C. lueddemanniana rubra** x **C. lueddemanniana escura**
Pot Size (Inches): 3" (NBS) Crossing of two selected plants with dark colored flowers and also good shapes.
Price (USD): 20,00

Z -1204 **C. lueddemanniana rubra 'Dark Giant'** x **C. lueddemanniana escura 'Fennel IX'**
Pot Size (Inches): NBS - BS Similar to Z-940.
Price (USD): 20,00

Z -790 **C. lueddemanniana tipo 'Pinky'** x **C. lueddemanniana rubra 'Gesia'**
Pot Size (Inches): NBS - BS Similar to Z-940.
Price (USD): 20,00

Z -860 **C. lueddemanniana tipo 'Royal Flash'** x **C. lueddemanniana tipo 'Drago'**
Pot Size (Inches): NBS - BS Few plants available. Both plants have large dark colored flowers with excellent shapes. We hope that the offsprings will reproduce their parents characteristics.
Price (USD): 23,00

Z -776 **C. lueddemanniana caerulea (Siquesique x Amp)** x **C. lueddemanniana tipo escura 'Guacamuco'**
Pot Size (Inches): NBS - BS We expect purple colored flowers with large size and very good shapes.
Price (USD): 15,00

C. luteola

Z -1467 **C. luteola aurea 'Ouro'** x **SELF**
Pot Size (Inches): NBS - BS Already blooming. Some plants have a small purple marking inside the lip and others not. These species is from the Amazon region so they like warm, humid conditions, with good light. Prefer to be mounted on a thin wood stick.
Price (USD): 30,00

Z -1462 **C. luteola 'Eldorado'** x **SELF**
Pot Size (Inches): NBS - BS Similar to Z-1467. C. luteola is a small sized plant, probably the smaller ones among all Cattleya. However, when well cultivated, they form beautiful clusters of yellow flowers which are very decorative. Plants like warm, humid conditions and to be mounted on sticks.
Price (USD): 30,00

C. maxima

C. percivaliana

Z -730 ***C. percivaliana 'Alberts' (original) (02-6)*** x ***C. percivaliana***

Pot Size (Inches): 3" - 3 1/2" With this crossing we are trying to produce superior quality flower shapes, like the parent plants. Similar to Z-550.
Price (USD): 23,00

Z -795 ***C. percivaliana 'Alberts' x SELF*** x ***C. percivaliana 'Peter'***

Pot Size (Inches): 2 1/2" Similar ao Z-730.
Price (USD): 23,00

Z -920 ***C. percivaliana carnea*** x ***SELF***

Pot Size (Inches): 3" (NBS) Rare variety, with almost white petals/sepals and light pink colored lip. The self pollination highly increases the probability of success.
Price (USD): 52,00

Z -918 ***C. percivaliana rosa 'Castro' (quase semi alb SELF***

Pot Size (Inches): 2 1/2" Beautiful unusual variety, almost semi alba. Petals are light colored.
Price (USD): 45,00

Z -644 ***C. percivaliana semi alba 'Altamira' (11-6)*** x ***C. percivaliana semi alba 'Carache' (06-6)***

Pot Size (Inches): 3" Crossing of two very good semi albas. We expect to reproduce this variety with also more vigorous growth.
Price (USD): 40,00

Z -1366 ***C. percivaliana 'Summit'*** x ***C. percivaliana tipo 'Remolacha' (19-6)***

Pot Size (Inches): 2 1/2" *C. percivaliana 'Remolacha'* has a beautiful and showy dark lip. *C. percivaliana 'Summit'* is a well known plant with very nice flower shape
Price (USD): 26,00

Z -760 ***C. percivaliana tipo 'Kawasaki'*** x ***C. percivaliana 'Seleção'***

Pot Size (Inches): 2 1/2" Similar to Z-730. The objective is to obtain superior quality flower shapes.
Price (USD): 23,00

Z -761 ***C. percivaliana tipo XXX*** x ***C. percivaliana 'Summit - Mutante'***

Pot Size (Inches): 2 1/2" - 3" *C. percivaliana 'Summit - Mutante'* is a clone of the original plant that suffered mutation so its flower shape and size is superior than the original plant. This cross is intended to produce "type" plants with very special flower shapes.

C. quadricolor

Natural species - Colombia

Z -764 ***C. quadricolor alba*** x ***C. quadricolor suavissima***

Pot Size (Inches): 3" (NBS) The alba variety is very rare in this species. In this case we crossed an alba with a "suavissima" which has a very light pink lip. The intention is to obtain light uniformed colored flowers and also good shapes.
Price (USD): 18,00

Z -472 ***C. quadricolor alba 'Esperança'*** x ***C. quadricolor caerulea suave-oculata***

Pot Size (Inches): 3" - 3 1/2" Similar to Z-764. *C. quadricolor caerulea suave-oculata* is a result from a previous crossing. Petals and sepals are white and the lip has two "eyes" of a different color tending to light blue. Plants are flowering albas.
Price (USD): 25,00

Z -782 ***C. quadricolor amesiana 'Patricia'*** x ***SELF***

Pot Size (Inches): 2 1/2" - 3" Self pollination of a beautiful plant with light tones of pink on the flowers. Confirm variety.
Price (USD): 34,00

Z -767 ***C. quadricolor semi alba*** x ***C. quadricolor semi alba '***

Pot Size (Inches): 2 1/2" - 3" Similar to Z-768.
Price (USD): 18,00

C. quadricolor

Natural species - Colombia

Z -768 C. quadricolor semi alba x C. quadricolor semi alba 'Pompeu'

Pot Size (Inches): NBS - BS We crossed these two very good semi alba varieties expecting to reproduce the quality of the parents, with dark lips.
Price (USD): 18,00

Z -772 C. quadricolor tipo XXX x C. quadricolor 'Rainha'

Pot Size (Inches): 3" Crossing of two exceptional plants, with very good flower shapes, Similar to Z-771.
Price (USD): 18,00

C. rex

Z -1506 C. rex (B) x SELF

Pot Size (Inches): 2 1/2" - 3" Few plants available. Peruvian species and still unusual in cultivation.
Price (USD): 30,00

C. schilleriana

Natural species - Brazil (Southeast)

Z -832 C. schilleriana 'Biriricas' x C. schilleriana 'Olinda'

Pot Size (Inches): 2 1/2" Similar to Z-831.
Price (USD): 28,00

Z -694 C. schilleriana caerulea '1' x C. schilleriana caerulea 'A'

Pot Size (Inches): 2 1/2" (NBS) Confirm very nice caerulea (blue lip).
Price (USD): 200,00

Z -831 C. schilleriana 'Guarapari' x C. schilleriana 'Olinda'

Pot Size (Inches): 2 1/2" Similar to Z-832. C. schilleriana 'Olinda' has standard colored flowers for this species, but exceptional flower shape. One of the best we know.
Price (USD): 28,00

AZ -17 C. schilleriana 'Sem ID' x

Pot Size (Inches): 3" (NBS) We lost the names of both parent plants used in this cross (no ID), but we sure used selected plants.
Price (USD): 28,00

Z -829 C. schilleriana verde (green) (A. Entringer)x SELF

Pot Size (Inches): 2 1/2" This plant have light green color mainly on the base of the petals/sepals. Flower shape is average. We hope to obtain greener plants with this self pollination.
Price (USD): 50,00

C. schofieldiana

Natural species - Brazil (Southeast)

Z -943 C. schofieldiana 'Arraial D'Ajuda' XXXX x SELF

Pot Size (Inches): 3" (NBS) Small plants. C. schofieldiana occurs in lower altitudes (around 980 feet high) in the lower part of the trees, closer to the forest ground. They occur in Espirito Santo State and in Bahia State and these populations have different flowering seasons although you cannot differentiate plants and flowers from each population. The flowers tend to have arched petals and sepals, but plants from Bahia State tend to have better shapes. This self pollinated selected C. schofieldiana 'Arraial D'Ajuda' was generated from Bahia plants and we expect very nice flowers.

Z -1196 C. schofieldiana 'Falésias' (BA) x SELF

Pot Size (Inches): 2 1/2" - 3" One of our nicest plants. This light colored C. schofieldiana has wide petals and beautiful flowers..
Price (USD): 30,00

C. schofieldiana Natural species - Brazil (Southeast)

Z -1261 *C. schofieldiana 'GU'* x *C. schofieldiana 'Ano Novo'*

Pot Size (Inches): 3" (NBS) This tall bifoliate is very attractive, but less popular than *C. leopoldii*, *C. guttata* and *C. bicolor*. *C. schofieldiana 'GU'* is one of our best plants and *C. schofieldiana 'Ano Novo'* is also a vigorous grower that produces many large flowers per stem.
Price (USD): 28,00

Z -1260 *C. schofieldiana 'GU'* x *C. schofieldiana 'Jubarte'*

Pot Size (Inches): 3" (NBS) Similar to cross Z-1261. *C. schofieldiana 'jubarte'* is brown colored with small spots on petals/sepals and also great shape.
Price (USD): 28,00

Z -1230 *C. schofieldiana 'Jubarte'* x *C. schofieldiana 'Falésias'*

Pot Size (Inches): 3" (NBS) Crossing of two beautiful plants. *C. schofieldiana 'Jubarte'* has dark color and *'Falésias'* lighter color tending to green. Both are selected plants.
Price (USD): 28,00

Z -953 *C. schofieldiana 'Potira'* x *C. schofieldiana 'Janáina'*

Pot Size (Inches): 2 1/2" Two very nice plants from this species.
Price (USD): 28,00

C. schroederae Natural species - Colombia

Z -794 *C. schroederae albescens* x *C. schroederae alba*

Pot Size (Inches): 3" (NBS) We expect light colored plants with good shapes. Few plants that flowered confirmed expectations.
Price (USD): 35,00

C. trianae Natural species - Colombia

Z -786 *C. trianae alba* x *C. trianae caerulea*

Pot Size (Inches): 3 1/2" (NBS) Some plants flowered concolor.
Price (USD): 32,00

Z -642 *C. trianae alba 'Castro'* x *C. trianae integra orlata vinho*

Pot Size (Inches): 2 1/2" *C. trianae integra-orkata vinho* has a red-vine colored lip. We expect types with nice shapes and maybe similar lip to the polen plant.
Price (USD): 28,00

Z -785 *C. trianae alba XXXX* x *C. trianae amoena 'Rainha'*

Pot Size (Inches): 3" Crossing of two excellent plants. The variety *amoena* is actually a semi alba with very light pink on the lip.
Price (USD): 28,00

Z -788 *C. trianae albescens XXX* x *C. trianae amoena 'Rainha'*

Pot Size (Inches): 3" Similar to Z-757. No plant flowered yet.
Price (USD): 28,00

AN -27 *C. trianae amesiana* x *C. trianae amesiana*

Pot Size (Inches): NBS - BS Confirm this variety with light pink lip.
Price (USD): 32,00

Z -757 *C. trianae amesiana A* x *C. trianae amesiana B*

Pot Size (Inches): 3 1/2" - 4" Confirm this rare variety of *C. trianae*, with very light tones of pink on the lip.
Price (USD): 35,00

C. trianae

Natural species - Colombia

Z -1231	<i>C. trianae amoena 'Maria Inês' (85-8)</i>	x	<i>C. trianae amoena 'President Geisel' (35-8)</i>
Pot Size (Inches): 2 1/2"	The amoena variety means that flowers are semi albas with light pink lips. Both plants are selected and we expect this variety based on the results of previous crosses.		
Price (USD): 30,00			
Z -758	<i>C. trianae amoena XXX</i>	x	<i>C. trianae amoena 'TA's'</i>
Pot Size (Inches): 3"	Confirm this variety. Large semi alba flowers, with light pink lip.		
Price (USD): 35,00			
Z -929	<i>C. trianae caerulea</i>	x	SELF
Pot Size (Inches): 3" (NBS)	Confirm the caerulea variety.		
Price (USD): 50,00			
Z -1228	<i>C. trianae caerulea 'Pedra Azul'</i>	x	<i>C. trianae caerulea 'Camila'</i>
Pot Size (Inches): 3"	This is a promising cross. <i>C. trianae caerulea 'Camila'</i> has flowers with exceptional shape and overlapping petals. <i>C. trianae caerulea 'Pedra Azul'</i> has similar qualities. We hope to reproduce this rare blue variety with also exceptional flower shape.		
Price (USD): 150,00			
Z -500	<i>C. trianae 'Da. Vitoria'</i>	x	<i>C. trianae concolor 'Rinaldi'</i>
Pot Size (Inches): 3 1/2" (NBS)	<i>C. trianae 'Da. Vitoria de Castro'</i> is a famous plant with exceptional flower shape. When crossed with this concolor, some plants already flowered concolor and "types" with very good forms.		
Price (USD): 39,00			
Z -732	<i>C. trianae escura 'Jean Groben' (11-8)</i>	x	<i>C. trianae 'Mariposa' (14-8)</i>
Pot Size (Inches): 3" (NBS)	We expect to obtain dark flower colors and also good shapes similar to the exceptional parent plants used.		
Price (USD): 23,00			
Z -1051	<i>C. trianae 'Fine Variety' (98-8)</i>	x	<i>C. trianae 'Junio' (12-8)</i>
Pot Size (Inches): 2 1/2" - 3"	Both parent plants have lilac flowers (type) but <i>C. trianae 'Junio'</i> has darker color. They also have very good flower shapes.		
Price (USD): 23,00			
Z -269	<i>C. trianae 'Junio'</i>	x	<i>C. trianae vini-colorata</i>
Pot Size (Inches): NBS	<i>C. trianae 'Junio'</i> has dark colored flowers and <i>C. trianae vini-colorata</i> has the dark color of the lip filling the outside of the tube. We expect nice lips contrasting with petals and sepals.		
Price (USD): 28,00			
Z -906	<i>C. trianae 'Junio' (12-8)</i>	x	<i>C. trianae 'Sangre de Toro II' (25-8)</i>
Pot Size (Inches): 3 1/2"	Crossing of two dark colored plants. We hope to improve flower shape of 'Sangre de Toro'.		
Price (USD): 28,00			
Z -430	<i>C. trianae 'Leana'</i>	x	<i>C. trianae 'Jean Groben'</i>
Pot Size (Inches): NBS	Few plants available. Excellent flower shapes are expected and also in darker colors. Darker tones of lilac are not common in this species.		
Price (USD): 28,00			
Z -793	<i>C. trianae orlata 'Dan'</i>	x	<i>C. trianae (Mariposa x Jean Groben)</i>
Pot Size (Inches): 2 1/2" - 3"	Similar to Z-499.		
Price (USD): 23,00			
Z -951	<i>C. trianae orlata 'TT' XXX</i>	x	<i>C. trianae 'Cecilia' (04-8)</i>
Pot Size (Inches): 3"	We expect very well shaped flowers of standard colors, and also the variety orlata (the dark part in the face of the lip surrounds all it's contour)		
Price (USD): 23,00			
Z -1398	<i>C. trianae rubra 'Eclipse'</i>	x	<i>C. trianae 'Sangre de Toro II' (25-8)</i>
Pot Size (Inches): 2 1/2"	Two very dark colors in <i>C. trianae</i> . Also known as "sangre de toro". The <i>C. trianae 'Eclipse'</i> has also very nice flower shape.		
Price (USD): 35,00

C. trianae

Natural species - Colombia

Z -1251 C. trianae 'Sangre de Toro II' (25-8) x C. trianae tipo 'Martinelli' (78-8)

Pot Size (Inches): 2 1/2" We expect dark colors. C. trianae 'Martinelli' has very wide petals.
Price (USD): 35,00

Z -1365 C. trianae semi alba 'Rinaldi' x SELF

Pot Size (Inches): 3" Pure semi alba variety is quite rare in this species. We plant to obtain this variety with this self pollination or at least very light colors on petals and sepals.
Price (USD): 38,00

Z -1199 C. trianae 'Taky Huaylla' (42-8) x SELF

Pot Size (Inches): 3" (NBS) 'Taky-Huaylla' is an indian name in Colombia that means "Song of the green land". It's an exceptional plant in all matters and the color is light pink. One seedling already bloomed with very similar characteristics from the mother plant.
Price (USD): 45,00

Z -499 C. trianae tipo 'Binotti' x C. trianae orlata 'Dan'

Pot Size (Inches): NBS - BS C. trianae (type) 'Binotti' has large and very nice shaped flowers. C. trianae orlata 'Dan' is a well known plant and the name "orlata" means that the dark purple of the lip is present in all it's contour. Our goal is to produce excellent shaped "type" plants and also orlatas.
Price (USD): 25,00

Z -1232 C. trianae tipo 'Fine Variety' (98-8) x C. trianae 'India' (10-8)

Pot Size (Inches): 3" Similar to Z-732.
Price (USD): 25,00

C. violacea

Natural species - Amazon basin

Z -1101 C. violacea alba 'Everest' x C. violacea alba 'La Peruana'

Pot Size (Inches): 2 1/2" We are trying to improve quality of flowers by crossing two albas. C. violacea alba 'Everest' is our top alba plant. As in crossing Z-1073, leaf and root tips of the seedlings are light green and indicate a possible confirmation of albas.
Price (USD): 395,00

Z -1091 C. violacea carnea (delicata) 'Rio Negro' x C. violacea carnea (delicata) 'AWZ'

Pot Size (Inches): NBS Rare. Two plants flowered and confirmed var. carnea. This variety may be considered as rare or even rarer than an alba or caerulea. Both parents have almost white petals/sepals and pink lip (similar color to Laelia purpurata var. carnea).
Price (USD): 395,00

Z -966 C. violacea rubra flamea 'Alcebiades' XXX x C. violacea tipo 'Golias' XXXX

Pot Size (Inches): 2 1/2" - 3" Both plants are exceptional. C. violacea rubra flamea 'Alcebiades' has darker color, excellent shape and also splashed petals wich makes it very special. C. violacea 'Golias' has standard colored flowers, very good shape and large flower size. It's a vigorous plant that produces many flowers per spike.
Price (USD): 40,00

Z -666 C. violacea semi alba flamea 'Monte Verde' x C. violacea semi alba flamea 'Monte Roraima'

Pot Size (Inches): 3" (NBS) Similar to Z-668. All plants confirm this variety.
Price (USD): 250,00

Z -668 C. violacea semi alba flamea 'Rio Trombetas' C. violacea semi alba flamea 'Monte Verde'

Pot Size (Inches): NBS - BS Beautiful...and rare. Plants have white color on petals and sepals but with heavy purple marking on petals (flamea) and also purple lip. They confirm this variety but intensity of purple in petals can vary.
Price (USD): 250,00

Z -1105 C. violacea tipo 'Golias' x SELF

Pot Size (Inches): 2 1/2" When C. violacea 'Golias' (dark - good shaped - large sized flowers) is side by side with other C. violacea type, it's always the first plant who calls your attention.
Price (USD): 40,00

C. warneri

Natural species - Brazil (Southeast)

C. warneri Natural species - Brazil (Southeast)

Z -714	C. warneri amesiana 'Mem. Roberto Kautsky'	x	C. warneri amesiana 'Feu Rosa'
Pot Size (Inches): 3" - 3 1/2"	We crossed two of the best known amesiana variety (light pink colored flowers). Both are top quality plants, having large flower size and excellent shape.		
Price (USD): 35,00			
Z -595	C. warneri amesiana 'Santa Leopoldina'	x	SELF
Pot Size (Inches): 2 1/2"	This plant has light color tones of pink (amesiana) and very large flowers.		
Price (USD): 35,00			
Z -896	C. warneri amesiana 'Santa Leopoldina'	x	SELF
Pot Size (Inches): 2 1/2" - 3"	Same as Z-595.		
Price (USD): 35,00			
Z -1139	C. warneri caerulea 'Carolina'	x	C. warneri caerulea 'Raasch'
Pot Size (Inches): 2 1/2"	Another try to obtain caeruleas. It's much harder to obtain the caerulea variety in C. warneri than, for example, in C. lueddemanniana or C. mossiae. Only few plants combine to reproduce this rare variety. Let's hope for this one.		
Price (USD): 28,00			
Z -830	C. warneri caeruleascent 'RK' XXX	x	SELF
Pot Size (Inches): 2 1/2"	Rare and very beautiful tone of light blue. Flowers are almost concolor and not the typical caerulea with light colored petals and blue lip.		
Price (USD): 38,00			
Z -815	C. warneri concolor	x	SELF
Pot Size (Inches): 2 1/2" - 3"	With this self pollination, we expect concolor varieties and even albas. Obtaining albas with self pollination of a concolor variety has happened before.		
Price (USD): 28,00			
Z -568	C. warneri concolor 'HI'	x	C. warneri venosa suave
Pot Size (Inches): NBS	Few plants available. We expect to obtain the venosa variety (few dark stripes on the lip). Both plants have good flower shapes.		
Price (USD): 23,00			
Z -958	C. warneri concolor-venosa 'Domingos Marti'		SELF
Pot Size (Inches): 3"	This plant has exceptional flower shape, and lip has just a few veins of darker purple.		
Price (USD): 35,00			
Z -676	C. warneri escura (Z-52)	x	C. warneri escura integra orlata
Pot Size (Inches): 4"	Similar to Z-683.		
Price (USD): 18,00			
Z -673	C. warneri escura 'Córrego D'antas'	x	C. warneri escura integra orlata
Pot Size (Inches): 3" (NBS)	Dark tones of purple are uncommon in this species. We crossed two plants of dark colors with also very good flower shapes.		
Price (USD): 26,00			
Z -841	C. warneri escura 'Érico' XXX	x	C. warneri rosea 'Érico'
Pot Size (Inches): 2 1/2"	Speculative cross between two distinct color varieties, one darker and one lighter but both with nice shapes.		
Price (USD): 26,00			
Z -683	C. warneri integra escura 'AWZ'	x	C. warneri flameada
Pot Size (Inches): NBS	We intend to obtain dark colored flowers with possible splash in petals and/or with also very dark lip. Dark colors in this species are not common.		
Price (USD): 28,00			
Z -529	C. warneri integra 'Evandro Perini'	x	C. warneri integra-orklata-pincelada 'Leonor'
Pot Size (Inches): 3 1/2" - 4"	Both plants have excellent flower shape and texture. The term "Integra" means that the dark color of the lip goes all the way to its edge, so there is no white border in the lip. The term "Orlata" means that the dark color is circling all the face of the lip instead of being only in the bottom part of it.		
Price (USD): 28,00

C. warneri Natural species - Brazil (Southeast)

Z -1096	C. warneri integra orlata 'FCC'	x	C. warneri tipo 'Lua Cheia'
Pot Size (Inches): 2 1/2"	Similar to Z-840.		
Price (USD): 28,00			
Z -817	C. warneri 'Pingo de Luz'	x	C. warneri integra-orklata-pincelada 'Superba'
Pot Size (Inches): 3 1/2" (NBS)	Similar to Z-529. Both plants are very beautiful and of superior quality. "Pingo de Luz" means "small light spot". C. warneri 'Superba' has also splashed petals (pincelada), which makes it very rare in this species.		
Price (USD): 28,00			
Z -690	C. warneri semi alba (boa forma)	x	C. warneri semi alba 'Rubi'
Pot Size (Inches): 3 1/2" - 4"	Both parents are selections of previous crossings and we expect even better results.		
Price (USD): 38,00			
Z -675	C. warneri semi alba 'Aline'	x	C. warneri semi alba integra orlata
Pot Size (Inches): 3" (NBS)	Similar to Z-580. We expect excellent semi albas with strong colored lips.		
Price (USD): 38,00			
Z -819	C. warneri semi alba 'Alto Parajú'	x	C. warneri semi alba 'Guindani'
Pot Size (Inches): 3"	Similar to Z-818.		
Price (USD): 35,00			
Z -818	C. warneri semi alba 'Alto Sapucaia'	x	C. warneri semi alba 'Guindani'
Pot Size (Inches): 3" (NBS)	C. warneri semi alba 'Guindani' is one of our best semi albas (flower quality) and C. warneri semi alba 'Alto Sapucaia' is already a second generation cross.		
Price (USD): 38,00			
Z -816	C. warneri semi alba 'Goiabeiras' (Z-108)	x	C. warneri semi alba 'Guindani'
Pot Size (Inches): 2 1/2" - 3"	Similar to Z-818.		
Price (USD): 38,00			
Z -1095	C. warneri semi alba 'Guindani'	x	C. warneri S/A int.-orklata 'Pater Noster'
Pot Size (Inches): 2 1/2"	Crossing of two of our best semi alba in this species. We hope to get very nice plants (semi alba variety).		
Price (USD): 38,00			
Z -1078	C. warneri semi alba 'Itabirana'	x	SELF
Pot Size (Inches): 2 1/2"	Self pollination of one of the highest quality semi albas known in this species		
Price (USD): 45,00			
Z -959	C. warneri semi alba 'Itabirana' (original)	x	C. warneri alba 'Da. Mercedes'
Pot Size (Inches): 3" (NBS)	A few years ago, this cross was available from other producers and plants confirmed semi alba, very similar to C. warneri semi alba 'Itabirana'. We repeated it with our own original plants to try to confirm these excellent semi albas obtained. C. warneri semi alba 'Itabirana' is one of the best natural semi alba found in this species, with large flowers and excellent shape.		
Price (USD): 28,00			
Z -580	C. warneri semi alba 'Itarana' (Z-30)	x	C. warneri semi alba orlata
Pot Size (Inches): 3"	C. warneri semi alba 'Itarana' is one of the best semi albas obtained from a previous crossing. C. warneri semi alba orlata is a spectacular plant where the purple surrounding the lip contrasts with the pure white petals/sepals. Confirm semi alba and semi alba orlata.		
Price (USD): 38,00			
Z -567	C. warneri semi alba 'Pedra Azul'	x	C. warneri semi alba 'Nr. 1'
Pot Size (Inches): 3 1/2"	The objective is to obtain semi alba variety. Both plants are selections of our previous crossings.		
Price (USD): 38,00			
Z -722	C. warneri suavissima 'Ricardo Bells'	x	C. warneri alba 'Perim'
Pot Size (Inches): 3 1/2" (NBS)	C. warneri suavissima 'Ricardo Bells' has almost white flowers and with very good shape. This plant was found in nature in the past. C. warneri alba 'Perin' has also superior quality and is a true alba.		
Price (USD): 27,00

C. warneri

Natural species - Brazil (Southeast)

Z -895 ***C. warneri suavissima 'Ricardo Bells'*** x **SELF**

Pot Size (Inches): 2 1/2" - 3" This plant has excellent shape and almost imperceptible pink on flowers. Looks more like an alba variety. Plant is also a vigorous grower. This is one of the famous plants found in the past near the city of Pancas-Espirito Santo State-Brazil.
Price (USD): 35,00

Z -576 ***C. warneri tipo 'Maravilha' (escura)*** x ***C. warneri integra-orkata "AWZ"***

Pot Size (Inches): 4" (NBS) As usual, we used two very good plants in this crossing. *C. warneri* 'Maravilha' has darker colored flowers and is a selection from a previous crossing. *C. warneri integra-orkata* 'AWZ' has very good flower shape, with no white margin on the face of the lip (integro variety) and with darker purple of the lip circling all it's circumference (orkata variety). This is a very interesting crossing with both plants having rare characteristics for this species.
Price (USD): 18,00

Z -1103 ***C. warneri tipo 'Schunk'*** x ***C. warneri tipo 'Pedra Azul'***

Pot Size (Inches): 2 1/2" This is a remake. Plants are vigorous growers, have large flowers and average good shapes.
Price (USD): 18,00

C. warscewiczii

Natural species - Colombia

Z -1478 ***C. warscewiczii alba 'Envigado'*** x **SELF**

Pot Size (Inches): 2 1/2" Rare. We expect to reproduce this variety.
Price (USD): 140,00

Z -1295 ***C. warscewiczii caerulea 'La Floresta' (07-2)*** **SELF**

Pot Size (Inches): 2 1/2" - 3" Rare. This is famous a dark caerulea and also very beautiful.
Price (USD): 140,00

Z -1296 ***C. warscewiczii S/A caerulescens 'Nacarada'*** **SELF**

Pot Size (Inches): 2 1/2" - 3" This very beautiful plant has light pink lip tending to blue, different from standard color. Flower shape is very good for this species.
Price (USD): 140,00

Z -1011 ***C. warscewiczii tipo 'Hector'*** x **SELF**

Pot Size (Inches): NBS - BS Self pollination of a selected *C. warscewiczii*.
Price (USD): 30,00

Dendrobium species

Z -1113 ***Dendrobium spectabile*** x **SELF**

Pot Size (Inches): 2 1/2" - 3" Native from New Guinea. This species likes intermediate to warm temperatures. Plants can reach 60 centimeters in high (aprox. 24 inches) and flowers have 7 cm (2 3/4") in diameter. Flowers are star shaped and twisted, with irregular edges. They have yellowish color on petals/sepals with brown/wine colored stripes that are intensified on the lip, making the flowers very attractive and unusual.
Price (USD): 17,00

Encyclia species

Z -1451 ***Encyclia alata*** x **SELF**

Pot Size (Inches): 3" Beautiful *Encyclia* from Central America all the way to Mexico.
Price (USD): 26,00

Z -1282 ***Encyclia amicta*** x ***Encyclia amicta***

Pot Size (Inches): BS Synonym: *Encyclia linearifolioides*. Easily recognized by the light brown color of petals/sepals, white lip and almost black colored anther cap. Plants are naturally small sized but very decorative when flowering. They like warm/intermediate climate, with a dry season during winter. Plants naturally occur in central Brazil, Colombia, Venezuela and Peru.
Price (USD): 17,00

Epidendrum species

Z -1377	<i>Epi. Pseudoepidendrum 1</i>	x	<i>Epi. Pseudoepidendrum 2</i>
Pot Size (Inches): NBS	Curious and beautiful species from Panama and Costa Rica. Plants like small clay pots, shadier and humid conditions. Warm to intermediate temperatures. Plants can reach 90 cm in height (3 feet) and produce 2 to 3 flowers on each short stem.		
Price (USD): 30,00			

Z -907	<i>Epi. schomburgkii</i>	x	
Pot Size (Inches): BS	Few plants available. This nice orange colored plant is very decorative. Plants are easy to grow (same conditions as for Cattleya) and roots tend to form a cluster above the pot. In nature these clustered roots probably capture leaves and other organic materials that fall in to form their own "potting media".		
Price (USD): 25,00			

HÍBRIDOS / HYBRIDS

Z -1135	<i>C. bowringiana 'Da. Estelinha de Novaes'</i>	x	<i>C. labiata integra orlata 'Zas-1'</i>
Pot Size (Inches): 3" (NBS)	C. PORTIA - We did a series of this popular cross in the past. Plants are easy to grow and produce an extremely decorative flower bouquet when plants are healthy. In this case we use a very dark colored C. labiata.		
Price (USD): 15,00			

Z -1340	<i>C. bowringiana semi alba suave 'Tower Grøv</i>		<i>C. labiata alba 'Nuvem Branca'</i>
Pot Size (Inches): 3" - 4"	C. PORTIA - Similar to Z-1135 and Z-1307. In this case our goal is to produce light colors of this hybrid, which are not usual.		
Price (USD): 20,00			

Z -1138	<i>C. gaskelliana caerulea 'Aida' (24-1)</i>	x	<i>C. intermedia caerulea 'Olhos Azuis'</i>
Pot Size (Inches): 2 1/2"	This hybrid named C. LADY CROSSLEY may produce beautiful caerulea plants. Also easy to grow.		
Price (USD): 23,00			

Z -1120	<i>C. guttata albina</i>	x	<i>Brassavola tuberculata</i>
Pot Size (Inches): 2 1/2" (NBS)	Natural hybrid called BC. xFREGONIANA. In this case we tried to obtain the alba variety of this hybrid which was never found in nature....but...unfortunately, up to now, many flowered with purple lips. Still nice.		
Price (USD): 14,00			

Z -1370	<i>C. labiata rubra integra-oralta-pincelada</i>	x	<i>L. pumila 'Ruby Queen'</i>
Pot Size (Inches): 2 1/2" (NBS)	Hybrid named LC. CORNELIA. Two very dark colored plants wer used in this cross.		
Price (USD): 23,00			

Z -967	<i>C. leopoldii 'Dark Show'</i>	x	<i>C. aurea 'Urabá-A'</i>
Pot Size (Inches): 3" (NBS)	We may get some interesting plants with this primary hybrid. C. aurea has yellow petals and sepals with a very showy lip, full of purple veins. C. leopoldi is a bifoliate Cattleya with spotted brown petals/sepals and purple lip.		
Price (USD): 20,00			

Z -1394	<i>C. schilleriana 'Água Surda'</i>	x	<i>C. Daphne "Bordeaux" (=C. schill x C. harris)</i>
Pot Size (Inches): 2 1/2"	C. schilleriana 'Água Surda' has very large and well shaped flowers. C. Daphne 'Bordeaux' has dark petals/sepals and very intense colored lip. We expect intense colors.		
Price (USD): 20,00			

Z -1205	<i>C. trianae caerulea (36-8)</i>	x	<i>C. lueddemanniana caerulea 'Pedra Azul'</i>
Pot Size (Inches): 2 1/2"	Another blue colored primary hybrid. We hope to obtain blue flowers and easy plants to grow.		
Price (USD): 16,00			

Z -978	<i>C. warneri alba 'Colossus'</i>	x	<i>L. kautsky</i>
Pot Size (Inches): 2 1/2" (NBS)	This is the reproduction of a natural hybrid found in Espirito Santo State many years ago. Flower size and form is between the two species and colors vary from pink to orange, always in light tones.		
Price (USD): 16,00			

Z -1097	<i>C. warneri caerulea 'Porcina'</i>	x	<i>C. intermedia flamea caerulea 'Olhos Azuis'</i>
Pot Size (Inches): 2 1/2" - 3"	This hybrid produces attractive blues flowers.		
Price (USD): 18,00

HÍBRIDOS / HYBRIDS

Z -798	<i>C. warneri semi alba 'Geneva'</i>	x	<i>L. praestans alba</i>
Pot Size (Inches): 2 1/2" (NBS)	This cross is a reproduction of a natural hybrid, but in this case, we are willing to obtain the semi alba variety which was never found in nature. Unfortunately the first plants that flowered did not confirm semi alba.		
Price (USD): 20,00			
Z -1034	<i>L. alaori suave 'Binot'</i>	x	<i>C. luteola 'Big Star'</i>
Pot Size (Inches): 2 1/2" (BS)	Miniature hybrid, with yellow to green flowers. In some plants the lips have light purple markings and in others flowers are concolor.		
Price (USD): 12,00			
Z -1086	<i>L. purpurata alba ('Cunha' x 'Campeã')</i>	x	<i>C. leopoldii 'Cetro de Esmeraldas'</i>
Pot Size (Inches): 3 1/2" - 4"	The crossing between <i>L. purpurata</i> and <i>C. leopoldii</i> is also a reproduction of a natural hybrid found in the past. Here we used to plants with high colors to also try to obtain light colored offsprings. This hybrid is registered as LC.ELEGANS, but it's popular name in southern Brazil, where it occurs naturally, is "Cavalão" which means "Large Horse" due to its vigorous growth and large size of plant.		
Price (USD): 23,00			
Z -991	<i>L. purpurata rubra flamea 'Osório'</i>	x	<i>C. leopoldii 'Marrom Glacê'</i>
Pot Size (Inches): 3"	LC. ELEGANS. Similar to Z-990, but in this case with darker colored flowers.		
Price (USD): 23,00			
Z -988	<i>L. purpurata rubra flamea 'Osório'</i>	x	<i>C. leopoldii 'Oliva'</i>
Pot Size (Inches): 2 1/2" - 3"	Similar to Z-991.		
Price (USD): 23,00			
Z -979	<i>L. tenebrosa 'Aline'</i>	x	<i>C. leopoldii 'Dark Prince'</i>
Pot Size (Inches): 3"	We expect decorative flowers, with brown petals/sepals and purple lip.		
Price (USD): 18,00			

L. alaori

Natural species - Brazil (Bahia State)

AZ -1	<i>L. alaori alba (CONFIRMED)</i>	x	
Pot Size (Inches): BS	Rare. White colored flowers.		
Price (USD): 120,00			
Z -1238	<i>L. alaori alba 'Snow Flakes'</i>	x	<i>L. alaori alba 'SC'</i>
Pot Size (Inches): NBS/BS	Although this species tend to produce light colored flowers, the pure alba variety is very rare. Some plants are flowering alba and others have very light pink tones.		
Price (USD): 50,00			
Z -1581	<i>L. alaori escura (Seleção de Z-618)</i>	x	SIBLING
Pot Size (Inches): NBS	Sibling cross between two very dark <i>L. alaori</i> . These dark tones of purple are very unusual in this species.		
Price (USD): 35,00			
Z -618	<i>L. alaori escura II</i>	x	<i>L. alaori escura I</i>
Pot Size (Inches): BS	Few plants available. <i>L. alaori</i> is a small sized species, with delicate flowers that usually do not completely open and also in light tones of pink. With this crossing, we are obtaining darker colors than average and also good shapes, which are rare qualities in this species.		
Price (USD): 35,00			
Z -1577	<i>L. alaori semi alba orlata (Z-605 x SLF)</i>	x	SELF
Pot Size (Inches): NBS	Some plants bloomed and presented very beautiful light rose colors and orlate lip. In this case the darker purple of the lip literally forms a ring shape on it		
Price (USD): 35,00

L. lobata Natural species - Brazil (Southeast)

Z -1167 *L. lobata caerulea 'AM-EC'* x **SELF**

Pot Size (Inches): 2 1/2" - 3" Laelia lobata grow on rocks in full sun, and are endemic to the large rock formations around the city of Rio de Janeiro. One of them is the famous "Sugar Loaf Mountain". They like warm to intermediate temperatures, bright light and lots of aeration. Caerulea variety is rare. Thanks to the growers, it's been reproduced and offered.
Price (USD): 38,00

L. perrinii Natural species - Brazil (Southeast)

Z -636 *L. perrinii semi alba 'W.F.'* x *L. perrinii alba 'R.A.'*

Pot Size (Inches): 2 1/2" (NBS) Seedlings that flowered have lighter tone of purple.
Price (USD): 20,00

Z -1579 *L. perrinii alba 'AM'* x *L. perrinii alba 'RK'*

Pot Size (Inches): 2 1/2" The L. perrinii alba 'AM' is one of the best in our collection, with large flowers and exceptional shape for this species. The truth is that this plants has na almost imperceptible pink tone on the lip so it's not a true alba. We expect albas or very light tones although it's another speculative cross, as Z-1584.
Price (USD): 35,00

Z -1584 *L. perrinii alba 'AM'* x *L. perrinii semi alba 'AWZ'*

Pot Size (Inches): 2 1/2" We may obtain flowers with light colored petals and sepals and purple lip. Highly speculative crossing.
Price (USD): 23,00

Z -1583 *L. perrinii concolor 'HG'* x **SELF**

Pot Size (Inches): 2 1/2" Rare color form in this species. L. perrinii became less cultivated by growers and most of the varieties are very old plants.
Price (USD): 35,00

Z -1154 *L. perrinii delicata 'AM' XXXX* x *L. perrinii semi alba 'WF'*

Pot Size (Inches): 2 1/2" - 3" The L. perrinii delicata 'AM' has flowers with almost imperceptible pink color (looks more like an alba), exceptional shape and also large size. This is a top quality plant among this species. When crossed with an also high standard semi alba, we hope to obtain light colors and possibly semi albas.
Price (USD): 23,00

L. praestans Natural species - Brazil (Espirito Santo State)

Z -945 *L. praestans 'Black Lip' XXX* x *L. praestans 'Black Ruby - Takako' XXXX*

Pot Size (Inches): 2 1/2" Similar to Z-844. About L. pumila 'Black Ruby-Takako', this plant has large dark colored flowers and a spectacular flower shape. It belonged to a friend for many years and it was supposed to be part of Mr. José Dias de Castro's orchid collection (famous grower from the past). It's such a good plant that we may have a suspicion of it being a hybrid. Due to the age of this plant and information of trusted people, we still risk to offer it as L. praestans.
Price (USD): 60,00

Z -1751 *L. praestans concolor rosea* x **SELF**

Pot Size (Inches): 2 1/2" (NBS) Only one plant bloomed and confirmed the rare concolor variety, very similar to the mother plant.
Price (USD): 150,00

Z -853 *L. praestans 'Daniel' XXX* x *L. praestans 'Dark Lip'*

Pot Size (Inches): 2" (NBS) Two excellent shaped L. praestans crossed. See Z-844
Price (USD): 28,00

Z -1168 *L. praestans 'Lena'* x *L. praestans 'Daniel'*

Pot Size (Inches): 2 1/2" We used two top quality plants on this crossing. This species is endemic to a small area at 600 to 700 meters high (1800 to 2100 feet) in Espirito Santo State-Brazil. Nowadays it is endangered mainly due to excessive collections from habitat.
Price (USD): 28,00

Z -1160 *L. praestans 'Rotunda' (Z-345)* x *L. praestans 'Vitória' (Z-345)*

Pot Size (Inches): BS Some plants of this second generation cross flowered and presented excellent results considering first blooming.
Price (USD): 35,00

L. purpurata Natural species - Brazil (South)

Z -855	<i>L. purpurata semi alba (quase) 'Osório'</i>	x	<i>L. purpurata semi alba (quase) 'Tubarão'</i>
Pot Size (Inches): 3" (NBS)	Similar to Z-856.		
Price (USD): 20,00			
Z -856	<i>L. purpurata semi alba (quase) 'Tubarão'</i>	x	<i>L. purpurata semi alba (quase) 'Sander'</i>
Pot Size (Inches): 3" (NBS)	Pure semi alba is rare on this species. Here we crossed two "almost" semi albas (with very light pink tone on petals/sepals). Similar to Z-855.		
Price (USD): 20,00			
Z -1272	<i>L. purpurata semi alba 'Deschamps'</i>	x	<i>L. purpurata semi alba 'Sindarosa'</i>
Pot Size (Inches): 2 1/2" - 3"	We expect to obtain semi albas or almost ones with light colored petals and sepals. In all cases we think we will obtain a very nice contrast between petals/sepals and lip.		
Price (USD): 24,00			
Z -1452	<i>L. purpurata suave 'Sissi'</i>	x	<i>L. purpurata russeliana 'Maria Cristina'</i>
Pot Size (Inches): 2 1/2"	Two very well known plants and also difficult to find in present collections. Both have light tones of pink and very nice flower shapes for this species.		
Price (USD): 25,00			
Z -579	<i>L. purpurata vermelha 'Sta. Lidia'</i>	x	<i>L. purpurata atropurpurea 'Deschamps'</i>
Pot Size (Inches): 3 1/2" (NBS)	Both plants have excellent flower shapes and vivid dark colors on lips.		
Price (USD): 23,00			
Z -842	<i>L. purpurata werkhauerei</i>	x	<i>L. purpurata werkhauerei</i>
Pot Size (Inches): 3" (NBS)	Crossing of two selected blue varieties of this species.		
Price (USD): 20,00			
Z -1483	<i>L. purpurata 'Werkhauseri'</i>	x	<i>L. purpurata werkhauerei striata</i>
Pot Size (Inches): 2 1/2"	We expect to obtain caerulea variety and also plants with blue markings (striata) on petals.		
Price (USD): 25,00			

L. rupícola Natural species - Brazil (Southeast)

Z -1441	<i>L. gloedeniana</i>	x	<i>L. gloedeniana</i>
Pot Size (Inches): 3" (NBS)	Endemic to a small area in Espírito Santo State, near the coast. This is the rupicolous Laelia that occurs at the lowest altitudes, around 300 meters (1000 feet). Plants can reach 40 centimeters in height (aprox. 16 inches) and produce yellow flowers.		
Price (USD): 20,00			
Z -695	<i>L. gloedeniana</i>	x	<i>L. gloedeniana</i>
Pot Size (Inches): 2 1/2" - 3"	Same as Z-1441.		
Price (USD): 20,00			
Z -868	<i>L. millerii BV</i>	x	<i>L. millerii 'Cristiane'</i>
Pot Size (Inches): 2 1/2" (NBS)	Few plants available. Two bright red <i>L. millerii</i> were used. This species is now endangered in habitat by iron ore mining.		
Price (USD): 22,00			

L. sincorana

Z -1485	<i>L. sincorana caerulea (clara)</i>	x	<i>L. sincorana caerulea escura 'AWZ'</i>
Pot Size (Inches): 2 1/2"	Esperamos repetir um cruzamento mais antigo que fizemos e onde foram obtidas caeruleas com variações em tonalidade, sendo alta incidência de caeruleas muito escuras.		
Price (USD): 40,00

L. tenebrosa

Natural species - Brazil (Southeast)

Z -848 L. tenebrosa 'Aline' x L. tenebrosa 'Gloriosa'

Pot Size (Inches): 3" (NBS) L. tenebrosa occurs in in the southern part of Espirito Santo and also in the border with rio de Janeiro State. It's rare in nature due to excess of collection in the past and also from extermination of the original forrests. L. tenebrosa 'Aline' and L. tenebrosa 'Gloriosa' are top quality plants so we expect superior shapes and standard yellowish/brown colors.
Price (USD): 25,00

Z -851 L. tenebrosa 'Fumacina Fujita' x L. tenebrosa extra XXX

Pot Size (Inches): 3" (NBS) We used two very nice L. tenebrosa, first one is a famous plant with lighter colors and the second is a very nice `type` colored plant.
Price (USD): 25,00

Z -993 L. tenebrosa vinicolor x L. tenebrosa 'Richard'

Pot Size (Inches): 3" (NBS) Smaller size. L. tenebrosa vinicolor is one of the darkests we have and L. tenebrosa 'Richard' a superb plant. We expect very nice shaped and dark colored plants.
Price (USD): 25,00

Z -687 L. tenebrosa vinicolor 'Eduardo' x L. tenebrosa 'Fumacina Fujita'

Pot Size (Inches): NBS - BS Few plants available. L. tenebrosa vinicolor 'Eduardo' is very dark and also good shaped - a trully special plant. This cross with the L. tenebrosa 'Fumacina Fujita' wich is a well known plant with excellent shape but lighter colors intend to produce plants also with excellent shapes and darker colors. Dark colors and good shapes are much harder to obtain in this species.
Price (USD): 25,00

L. xanthina

Z -1320 L. xanthina verde x SELF

Pot Size (Inches): 2 1/2" L. xanthina is unusual in collections and also threatened in nature. Flowers don't have many variations in shape and color so plants are not popular among growers A large plant of L. xanthina in full bloom is really something nice to see. The "green" variety is really "greenish" and may vary according to growing conditions.
Price (USD): 36,00

Miltonia species

Z -985 Milt. moreliana 'Bordeaux' x SELF

Pot Size (Inches): NBS - BS Although Miltonia moreliana is considered to be a variety of Miltonia spectabilis, we separate them in two species. They have distinct habitats and distinct flowering seasons. There is also varieties of the moreliana type (alba, semi alba, etc.). Miltonia moreliana tolerates warm weather and this special plant has a distinct wine colored flowers.
Price (USD): 18,00

Z -1487 Milt. spectabilis alba 'Biriricas' x SELF

Pot Size (Inches): NBS-BS The alba variety is much harder to occur in Miltonia spectabilis than in Miltonia moreliana. Both species have identical flowers but occur nattuily on different areas and have also different blooming seasons. Milt spectabilis occurs on higher altitudes and tolerates intermediate to cooler temperatures.
Price (USD): 25,00

Oncidium species

Z -987 Onc. crispum XXX x Onc. crispum XX

Pot Size (Inches): 2 1/2" Large brown flower. This is one of the nicests Oncidium species from Brasil. Plants like to be mounted with high humidity and air circulation. Cooler climate.
Price (USD): 18,00

Z -897 Onc. trulliferum x

Pot Size (Inches): 3" Few plants available. This Oncidium nowadays is quite rare in nature and occurs in the tropical atlantic rain forrest (Southeast Brazil) at altitudes around 1600 feet (500 / 600 meters). Plants like to be mounted on a tree fern slab and enjoy humidity.
Price (USD): 20,00

Outros gêneros

Z -1304	<i>Ansellia africana albina</i>	x	SELF
Pot Size (Inches): 2 1/2" - 3"	Rare. This is a cream colored, spotless variety of this species from South Africa. Very beautiful and also a slow grower. These plants need drier conditions during rest period plus bright light and temperature drop at night.		
Price (USD): 70,00			
Z -1325	<i>Brassia chloroleuca</i>	x	
Pot Size (Inches): BS	Brassia from the Amazon region. Smaller but nice flowers.		
Price (USD): 16,00			
Z -1532	<i>Brassia lawrenceana</i>	x	SELF
Pot Size (Inches): NBS-BS	Another species from the Amazon region. Brassia cochleata is a possible synonymous. Plants are easy to grow. Like high humidity and warm weather.		
Price (USD): 20,00			
Z -1346	<i>Dimeranda emarginata alba</i>	x	SELF
Pot Size (Inches): NBS - BS	Rare. This looks like an Epidendrum and belongs from the State of Bahia. Plants are confirming alba variety. Few plants available.		
Price (USD): 38,00			
Z -1542	<i>Maxillaria schunkeana</i>	x	
Pot Size (Inches): 2" (NBS)	"Black orchid". Small sized plant with very dark (almost black) small flowers. Plants easily form clusters. In this case our plants were obtained by seeds which is unusual due to the extreme difficulty to pollinate flowers.		
Price (USD): 28,00			
Z -1548	<i>Oesterdella pseudoschurmanniana</i>	x	SELF
Pot Size (Inches): H=25 cm(alt)	Species from Costa Rica, considered as difficult to grow (we don't think this is true). Flowers are Epidendrum like and very decorative. Intermediate to cooler weather.		
Price (USD): 35,00			
Z -1339	<i>Pleurothallis giehbrestiana</i>	x	SELF
Pot Size (Inches): 2 1/2"	Natural from Costa Rica, easy to grow in intermediate to warm conditions. This is a very decorative plant, with clusters of cream colored flowers. Like humidity.		
Price (USD): 35,00			
AZ -24	<i>Promenea xanthina</i>	x	
Pot Size (Inches): NBS - BS	Yellow flowered Promenea. Small sized plant that forms clusters with many flowers making them very decorative. Intermediate climate with lower light and high humidity.		
Price (USD): 35,00			
Z -1509	<i>Prostechea prismatocarpum</i>	x	SELF
Pot Size (Inches): 2 1/2"	Natural species from Mexico and Central America, with relatively easy cultivation. Plants reward growers with beautiful blooms of spotted flowers. Due to actual changes in nomenclature, this plant also has the following synonyms: Panarica prismatocarpa, Encyclia prismatocarpa or Epidendrum prismatocarpum.		
Price (USD): 25,00			
<hr/> Pseudolaelia species <hr/>			
Z -1450	<i>Pseudolaelia brejetubensis</i>	x	<i>Pseudolaelia brejetubensis</i>
Pot Size (Inches): 2 1/2" (NBS)	Few plants -rare. Flowers are small and white.		
Price (USD): 22,00			
Z -1324	<i>Pseudolaelia canaanensis</i>	x	<i>Pseudolaelia canaanensis</i>
Pot Size (Inches): 2 1/2"	The largest of all Pseudolaelia we know. Light yellow colored flowers. These plants thrive naturally as rupicolous but can be mounted in wood (inclined).		
Price (USD): 20,00			
Z -1541	<i>Pseudolaelia citrina</i>	x	<i>Pseudolaelia citrina</i>
Pot Size (Inches): 2 1/2"	Rare. Few plants available from this endemic species from the mountains Espirito Santo state. Flowers are small (almost one inch in size) and have brown petals/sepals and a yellow lip. Plants like bright light.		
Price (USD): 25,00
